

IL GIARDINO DI ALBERT

Il Giardino di Albert ("Albert's Garden") is the scientific magazine of RSI, structured as a series of brief informative episodes. It addresses the important issues that directly concern our daily lives (such as the environment, health, nutrition) with the intent of introducing the general public to the newest findings of laboratory research (medicine, astronomy, new discoveries and technological inventions) and to the questions pertaining to the fields of humanities, such as social science, psychology and philosophy. With its jargon-free approach, it takes part in the debate on some of the fundamental themes that are relevant to our society.
